## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "means for blocking", "a means for putting or not the artificial muscle under pressure", "several artificial muscles in series arranged on the same branch of the loop", "a device to be moved is linked directly to the linked to the cable", "how the device to be moved is linked to the cable via a pulley transmission", and "at least on to the pulleys is linked to a fixed point via a resilient means" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Priority***

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which

Art Unit: 3682

was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification fails to adequately describe the pneumatic displacement system. The specification is inadequate regarding the means for blocking the two pulleys. What are the means and how are they connected to the pulleys? How are the blocking means controlled? Are the springs considered to also be a means for blocking the pulleys?

The specification is inadequate regarding the means for putting the artificial muscle under pressure. What are the means for putting the artificial muscle under pressure and how are they connected to the artificial muscles?

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

6. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 7, it is unclear what the limitation, "a means for putting or not" refers to.

In claim 4 line 4, it is unclear what a "complementary manner" refers is supposed to mean.

In claim 7 lines 2 and 3, it is unclear how the device to be moved is linked to the cable via a pulley transmission.

Art Unit: 3682

7. The patentability of claims 1-14 could not be determined due to the outstanding 35 U.S.C. §112 1<sup>st</sup> and 2<sup>nd</sup> rejections.

**Conclusion**
